

MDS Autoclaves

Dentalclave 12L

The convenient and economical 12L Dentalclave is designed specifically for rapid sterilisation for a variety of dental instruments. This is a compact autoclave which will easily slot into any decontamination room.

New Tray Design

Our new trays have been specifically designed to allow dentists to sterilise larger sets of instruments easily.

Size: 280mm(L) x 180mm(W) - This is the equivalent of our MDS 18 Litre chamber trays.
